PARAUROLOGIC SEMINAR
SECOND ANNUAL MEETING

Sponsored by
AMERICAN UROLGICAL ASSOCIATION, INC.
The Palmer House
Chicago, Illinois
May 21-22, 1971
Ladies and Gentlemen:

On behalf of the American Urological Association, may I welcome you to the Second Annual Paraurologic Seminar. We are most pleased that you have been able to come and that you have shown an interest in continuing urologic education. Urologists throughout the country are eager to provide specialized urologic instruction for their paraurologic associates and they have enthusiastically supported the development of this program.

The seminar will cover a wide range of topics with special emphasis on urologic diseases as they relate to patient care. The panel discussion arrangement will make it possible for you to give special attention to subjects which you find particularly interesting. If you would like the faculty to answer some specific questions during the meeting, please submit these at the registration desk on the special form provided in this program.

The team approach to patient care is certainly one of the most widely discussed issues in medicine today. The A.U.A. hopes that the interchange of ideas and problems among urologists and allied health professionals which will occur here within the next two days will strengthen the working relationship between these groups and awaken us to new methods of improving the services we jointly render. It also hopes that through educational ventures such as this each member of the urologic team will rise to his own ultimate level of utility and personal fulfillment.

May I take this opportunity to thank each and every one of you for the enthusiasm and personal contributions which have made this seminar possible. We are most grateful and in return wish you an enjoyable and professionally valuable experience here.

Sincerely,

[Signature]

Arthur T. Evans, M.D., Chairman
