Title: Laboratory Studies in the Evaluation of Urologic Disease: Part I

Diagnostic Tests and Tools in the Evaluation of Urologic Disease: Part II

**Objective:**
This educational activity is designed for nurses and other health care professionals who care for, evaluate, and educate patients regarding urologic disease. The evaluation that follows this two-part article is designed to test your achievement of the following educational objectives. After studying this offering, you will be able to:

1. List laboratory studies used in evaluating urologic disease.
2. Describe the collection procedures of laboratory studies used in evaluating urologic disease.
3. List diagnostic studies used in evaluating urologic disease.
4. Discuss the procedural care associated with diagnostic studies used in evaluating urologic disease.

**Answer Form:**

1. Name one new detail (item, issue, or phenomenon) that you learned by completing this activity.

This activity has been provided by the Society of Urologic Nurses and Associates, which is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation (ANCC-COA). The SUNA is reciprocal in the states and specialty organizations that recognize the ANCC-COA accreditation process. SUNA is an approved provider of continuing education in the following states, California BRN #05556, and Iowa, BRN #169. The content of this program complies with chapter five of the Iowa Administrative Code as described in 5.3 (2)a. The ANCC-COA requires that all CE and participant records be kept on file at the National Office for a period of five years. Licenses in the states of CA and IA must retain this certificate for four years after the CE activity is completed. Other mandatory CE states may have different record requirements. Please be aware of your state's procedure.
